KS2 attainment reports (provisional) now available

01 Nov 2024

Schools can access via the 2023/24 reports section on your school page on the Ealing Grid for Learning (log-in required)

About the reports

The content of these reports is slightly changed since last year. Primarily, we have not been able to replicate our detailed progress analysis as prior attainment data and metholodgy was not available for this cohort.

The reports contain summary tables, over time performance graphs, borough-level comparison data, EYFS-KS2 value added matrices, pupil group analysis, and an individual pupil report.

Please note: The data items in this report come from the provisional release from the DfE last month. The only recent arrivals excluded are those that were made known to the LA when schools were contacted in July. This Version 1.0 report does not include the final amendments from the recent DfE tables checking exercise.

Version 2.0 of this report, based on final data (including remarks and excluding recent arrivals accepted by the Department for Education) will be uploaded early next year, depending on when the DfE release the final data files.

Data protection of confidential information

When you download information which has been password protected on the EGfL you are agreeing to take responsibility for what happens to that information next and its security. Elements of this report include pupil-level and sensitive information. Please do not share without consideration.

In short: never share your user account details, always log out, never leave personal data unattended and use secure equipment (ie secure encrypted devices)

If you pass that information on to appropriate other people you must do so via secure systems – eg Egress or S2S.
