

Product recall: Conen motorised display wall mount (SCETAW)

14 Feb 2025

Product description

A motorised height adjustable mount for 55"-100" (interactive) flat panel display screens. SCETAW model is wall mounted and comes with a column that offers 50 cm vertical travel.

Maximum load of lift unit is 150kg. Intended for use in schools and educational establishments

Health and safety issue

Risk of serious crushing or impact injury to children may arise due to detachment from the wall and the equipment falling forwards.

The centre of gravity results in the unit tending to lean forwards away from the wall and stability relies on the suitability and strength of wall fixings.

Remedial action

If any school uses these mounts:

- Contact the manufacturer/supplier for further advice.
- Contact Raj Chowdhury, schools health and safety on the details below.
