“
Using SelectaDNA as a burglary reduction measure has had a real and lasting effect on our local community, reducing the fear of crime as well as actual levels of crime.”

**Community Safety Manager,
 Salford New Deal for Communities**

Protect your valuable IT and AV equipment from just 59p per item.

Recommended and used by Police Forces worldwide, SelectaDNA is also available to buy in commercial kits, helping to protect schools, businesses, local authorities and hospitals across the UK.

Protect all your valuable assets including PCs, laptops, audio visual equipment and projectors by applying the unique DNA formula, which becomes visible under UV light. Tamper resistant stickers are supplied with each kit to warn criminals away from marked items and placing SelectaDNA signage around your premises, is proven to reduce your chances of being a victim of theft and burglary by upto 85%.

SelectaDNA irrefutably links criminals to crime scenes providing an unbreakable chain of evidence in a court of law, and improving the recovery of stolen assets.

Advances in DNA technology are helping police convict criminals daily, so the 'DNA fear factor' is keeping thieves well away from your valuables.

What is SelectaDNA?

- > SelectaDNA is an easy-to-apply property marking solution that consists of a unique, synthetic DNA code, thousands of microdots, and a UV tracer. The SelectaDNA mark can be used to identify the registered owner of lost or stolen property.
- > SelectaDNA is virtually invisible to the naked eye, but glows blue under the UV search lights that are used by the Police.
- > The SelectaDNA microdots contain the details of both the unique owner code and the website address for the SelectaDNA database.
- > Police can quickly identify the owner of a marked asset via the Secure Asset Register, Selectamark's Police and LPCB approved database.
- > If required the SelectaDNA product can be analysed by a forensic laboratory to determine the unique DNA code, and therefore the owner of the marked item of property.
- > SelectaDNA Grease and Gel are transferable substances which are applied to vulnerable items, in order to mark offenders who come into contact with them. SelectaDNA Grease is used to mark lead roofs and other metal items and SelectaDNA Gel is used in covert operations where internal theft of assets or cash is occurring.
