

## Revised boundaries for SAFE teams

We have reviewed the referral demands on the two teams in recent months and also the travel distances for families and staff involved with the revised service and slightly amended the original boundaries for the new service in the light of this.

We anticipate that these adjustments will reduce the likelihood of any one team experiencing significantly higher demand from referrals and will reduce travel time for families and staff thus making the service more accessible.

From 13 July 2015 the boundaries for the new teams are outlined in the map below.
