

Going for a Covid-19 vaccination

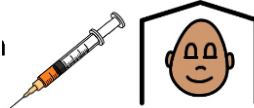

There is a virus called Coronavirus

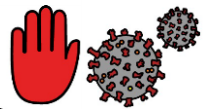

I will need to be protected against the virus

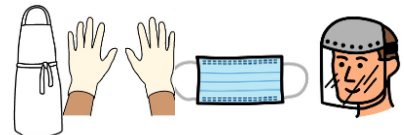

Injections can help to keep us safe

The person giving the injection will be dressed up to protect them from germs

They will be wearing an apron, gloves, mask and face shield

Lots of people will need to injection so I may have to wait a little while

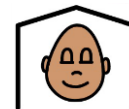

The person who is dressed up will put an injection in my arm

I can't see the person's face, but they are kind and they are smiling

The person giving the injection is helping to keep me safe and well

This might not feel very nice, but it will be finished very quickly

My grown up will look after me
